That's the craziest thing I ever saw but it worked. Thanks Terence!

Hello Michael,

Thank you for posting here.

According to your description, I understand that the "Select a New Tape Changer" was not available in Server Management\Backup. If I have misunderstood the problem, please don't hesitate to let me know.

Based on my research, the link "Select a New Tape Changer" may not be present if the data of the registry value "Backup Location" is not set to 1.

I suggest we try the following steps to see if we can resolve this issue:

1. Open Registry Editor,
2. Locate the registry key:
HKLM\Software\Microsoft\SmallBusinessServer\Backup,
3. Check the registry value "Backup Location" in the right pane.
4. If it's set to 2, double-click it and change the data to 1.
5. Click Ok to finish.

Then check if you can see the "Select a New Tape Changer" link in Server Management\Backup.

Hope these steps will give you some help.

RE: Missing "Select a New Tape Changer" under Backup – Server Man

Thanks and have a nice day!

Best regards,

Terence Liu(MSFT)

| I did a default installation of SBS 2003 R2 and noticed that there is no
| option for "Select a New Tape Changer" in the menu or when configuring a
| scheduled backup. All of the other menu options are there (Backup Now,
| etc...).

|
| Where could it have gone?
