Hi Abe,

Thanks for your updating.

Please also try the following steps:

1. Log in as a the local administrator of the box, can you see the security tab?
2. Reboot the server in safe mode, what's the result?
3. Run XCACLS.EXE and try to reset the permission.
4. Use advanced security permissions to inherit and take ownership of the folder
5. Check the following registry key:

HKEY\_LOCAL\_MACHINE\Software\Classes\\* ShellEx\PropertySheetHandlers if the the CLSID for the Security Shell Extension exists. {1F2E5C40-9550-11CE-99D2-00AA006E086C}.

Verify we have the key: {1F2E5C40-9550-11CE-99D2-00AA006E086C} exists at the HKLM\Software\Classes\Drive\shellex\PropertySheetHandlers.

I am looking forward to hear from you.

If you need further assistance, please don't hesitate to let me know.

Best regards,

Robert Li(MSFT)

RE: No security tab on one folder

This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.

<  
<Hello ABe,  
<  
<Thanks for posting in our newsgroup.  
<  
<I am sorry for the delay for the weekend.  
<

RE: No security tab on one folder

RE: No security tab on one folder

<From your description, I know that on the Windows Storage server 2003 R2,  
<there is no security tab on a folder and when you try to open, you get the  
<error message "Access Denied". If I am off-base, please don't hesitate to  
<let me know.

<

<Based on my researched on this issue, please take the following steps:

<

<Step 1: Do you have Corel Draw Software installed? If yes, the security  
tab

<will be missing.

<

<If you have Corel software, the Corel Clip Art folder will give us the  
<problems. Locally, when you right click on the folder, there is no  
security

<tab, just sharing and general.

<

<It appears that Corel puts this in a different file format. Right-clicking  
<on the folder tells him to convert it to a regular Windows folder. After  
<that you can see the security tab.

<

<Step 2: If you have software such as ServerProtect, ScanMail, OfficeScan,  
<ServerProtect Information Service, InterScan Virus Wall E-manager  
installed

<on the server, the problem may occur.

<

<To resolve this:

<

<Uninstall the above software and then try again.

<

<Step 3: Reboot the server to Safe Mode without Network, will the same  
issue

<reoccur?

<

<Step 4: Check the disk by the following command.

<

<chkdsk G:\ /F

<

<Step 5: Register rshx32.dll using regsvr32 .

<

<Please run the following command:

<

<Regsvr32 rshx32.dll

<

<Step 6: Make sure "Simple File Sharing" is already disabled.

<

<Step 7: If this is a Plugins folder, please restart a server and try  
again.

<

<If you can see the security tab again, could you right-click the  
<problematic folder, select the Properties, choose the Security tab, click  
<the Advanced button, and choose the Owner tab. Could you take owner of
