I am testing this tool from my own lan and says 4125 port is closed, tried 25 an that is open.
I can still rww into my lan so am i doing something wrong tested 4125

Dave,

Goto <https://www.grc.com/x/ne.dll?bh0bkyd2> click on the "Proceed" button type the port you want to check and click on the 'User Specified Custom Port Probe'. Try both 3389 and 4125

See what the result is. Since you can access the remote internally, the configuration is correct. If there was a problem with RWW you wouldn't be able to access it internally either. Something is preventing the external connections. What is the exact error number you get in Internet Explorer?

Hi Costas,

It has a hardware sonicwall firewall. The user has lost the password so before resetting this I brought in 3com officeconnect. did all the usual setup of this configured firewall ports as below. Wont connect. I turned off firewall and tryed with no luck.

Is there any way of testing connections to port 4125

Maybe it needs a RWW reinstall?

Re: Can only connect to local RWW, over internet cannot

"Costas" wrote:

This is most probably a firewall issue. I would start by disabling the firewall on the router and see if you can access the remote. If not, then re-enable the firewall (with the forwarded ports as you have them now) and move to the server. If you have two NICs on the server then go to Routing and Remote Access and check the basic firewall to make sure that the 4125 port is open. I know you said that you run CEICW but these checks are for the 'just in case' scenario.

Hi Costa,

It is standard edition, sp1 with security updates

"Costas" wrote:

Dave,

Is this a Standard Edition?
(No ISA)? R2? Is SP2
installed?

Re: Can only connect to local RWW, over internet cannot

Hi Costa,

No (though
I wish!) I
am
connecting
to
<https://mail.test.com/remote>

I can logon
to owa no
prob, when
I try logon
to server IT
waits for
ages
and
comes back
with error
begining
"Could not
connect to
the..

When I
connect
locally Its
ok
(<https://127.0.0.1/remote>)

I have
restared iis,
stopped
IAC,
restared
default
website,
companyweb,
recreated ssl
certificate
twice
through
cieww

Any ideas
Please

Re: Can only connect to local RWW, over internet cannot

You
don't
use
the
127.0.0.1
IP
address
to
access
the
server
over
the
Internet,
do
you?

Hi
There,
I
can
connect
to
<https://127.0.0.1/remote>
but
cannot
connect
over
the
internet.
I
have
checked
3com
router
and
forwarding
4125
443
&

Re: Can only connect to local RWW, over internet cannot

3389
to
the
server

I
can
connect
to
outside
RWW
from
this
server
I
am
working
on

I
have
run
ceiw
tool,
recreated
ssl
cert,
Run
remote
access
tool
etc

I
think
it
maybe
corrupt
any
ideas
please,
is
it
possible
to
reinstall
RWW

Regards
Dave
