Hello Gregg,

Thank you very much for update. I appreciate your time on this post.

I'm glad to hear that things are working correctly now.

Thank you and have a nice day,

Best regards,

Terence Liu(MSFT)

Microsoft CSS Online Newsgroup Support

Get Secure! – www.microsoft.com/security

=====
This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.

Re: DNS Server Name

|>
|> Thank you for kind update. Let's also thank Gregg for the detail input.
|>
|> 1. We can run SBS under single NIC. There is no problem.
|>
|> 2. Please enable NetBIOS over Tcpi on the NIC.
|>
|> 3. Run the CEICW for single NIC configuration:
|>
|> One network adapter – UPnP router connection to broadband
|> a. Before you run the Configure E–mail and Internet Connection Wizard,
|> make sure that the network connection to the router is enabled, that the
|> cables are connected, and that the router is turned on.
|>
|> b. A message that reports that the UPnP router was detected appears. If
|> the message does not appear or if you want to configure the router
|> manually, go to the " Two network adapters – manual router connection to
|> broadband " section.
|>
|> c. When the wizard prompts you to indicate whether you want to
configure
|> the router, click Yes.
|>
|> d. On the Router Connection page, the values will be populated by the
|> UPnP
|> router. Type different values if the values that you want are different.
|>
|> e. Click to select the My server uses a single network connection for
|> both
|> Internet access and the local network check box, and then click Next.
|>
|> f. A message may appear that warns that the firewall that is provided
|> cannot be configured. You are offered a chance to view information about
|> configuration settings for an existing firewall device.
|>
|> g. Key in your e–mail domain name in "Email Domain Name" page.
|>
|> Important: Please input your public domain name here: ie2architects.com
|>
|> h. Complete the Configure E–mail and Internet Connection Wizard.
|>
|> If you still get error when you run CEICW, please capture screenshots on
|> the error messages and send the pictures to me at
v–terliu@xxxxxxxxxxxxxxxxx
|> Meanwhile, gather the icwlog.txt file in the "C:\Program Files\Microsoft
|> Windows Small Business Server\Support" folder, and send to me.
|>
|> I hope these steps will give you some help.
|>
|> Thanks and have a nice day!
|>
