Hi Scott,

Thanks for your reply.

If you uncheck the box "Automatically Update email addresses based on recipient policy" and delete the user@xxxxxxxxxx address, the user will only have e-mail address user@xxxxxxxxxx and will not get the e-mails from external.

In addition, if you don't want to change the Default recipient policy and you want to change it for one user only and not for the whole company, then uncheck the box "Automatically Update email addresses based on recipient policy" is indeed the most right way.

I'd like to give you more information for your reference:

Microsoft CSS Online Newsgroup Support

Get Secure! - [www.microsoft.com/security](http://www.microsoft.com/security)

=====

This newsgroup only focuses on SBS technical issues. If you have issues regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
