- 

Hi All,

We had an intrusion into the network and now have a few issues. Primary is that Automatic Updates are not operating on the SBS server. It appears to be a group policy, but as yet I am unable to edit it, even logged on as Administrator. The SBS server is the DC and the results of gpresult are pasted below. The clients are relying on WSUS to push updates, and that is no longer happening. It is SBS Server SP1...if you think installing SP2 will help, I will proceed with that, but I fear the group policy will not change.
