Hi Bert,

Thanks for your reply.

I am glad to know the problem was fixed after you uninstalled the printer.  
I'd like to give you additional information for for reference:

My Network Places "net crawler" functionality  
<http://support.microsoft.com/kb/256248/en-us>

Computer description appears before the computer name in the My Network  
Places Browse list  
<http://support.microsoft.com/kb/824386/en-us>

Hope this helps.

If you have any problem in future, please don't hesitate to let me know.

Best regards,

Robert Li(MSFT)

Microsoft CSS Online Newsgroup Support

Get Secure! – [www.microsoft.com/security](http://www.microsoft.com/security)

=====  
This newsgroup only focuses on SBS technical issues. If you have issues  
regarding other Microsoft products, you'd better post in the corresponding  
newsgroups so that they can be resolved in an efficient and timely manner.  
You can locate the newsgroup here:  
<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the  
"Notify me of replies" box to receive e-mail notifications when there are  
any updates in your thread. When responding to posts via your newsreader,

Re: List of servers in this workgroup is currently not available.

Re: List of servers in this workgroup is currently not available.

please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly
