What are you spamming all the lists tonight or something?

Andre.Lee.group.com@xxxxxxxxx wrote:

:: Unix and Linux Hacking and Security ::

1. Unix – Vulnerabilities and Advisories

— Tutorials and Papers

— Specific Exploits and Vulnerabilities

2. Unix – Security Tools

— Unix Security and Audit Tools (Including IDS and Access Control Tools)

— Unix Log Analysis Tools

— Unix Proxies, Firewalls and Accessories

— Unix Miscellany

3. Unix – BSD, FreeBSD, etc...

— FreeBSD

— BSD and Misc. BSD variants

— BSD Security Tools

— BSD Micro-distributions

4. Unix – Solaris, SunOS etc...

— Solaris

— SunOS

— Cobalt Appliances

— SunOS and Solaris Security Tools

5. Unix – Other Flavors (Irix, HPUX, AIX, etc...)

— SGI/Irix

— HP-UX

— AIX

— SCO

— Miscellaneous

6. Linux – Vulnerabilities and Advisories

— Linux – General Hacking

Re: Computer Security Information and What You Can Do To Keep Your System Safe!

- Linux Application Exploits
- Linux – Red Hat Specific
- Linux – Debian Specific

7. Linux – Security Tools

- Linux – Intrusion Detection
- Linux – Access Control
- Linux Log Analysis Tools
- Linux Rootkits
- Linux Proxies and Firewalls
- Linux – General Security and Audit Tools

8. Linux – Security-oriented mini- and micro-distributions

- DMZS-Biatchux
- NSA Security Enhanced Linux
- Linux Mini- and Micro-distributions
- Applications

::: Windows Hacking and Security :::

1. Windows Vulnerabilities, Advisories, and even security flaws introduced by so-called security products!!!

- Microsoft IIS Vulnerabilities
- Microsoft FrontPage Vulnerabilities
- Microsoft Internet Explorer Vulnerabilities
- Windows Application Vulnerabilities
- Windows Internet/Networking Vulnerabilities
- Insecurities introduced by "security" programs!
- Netscape Browsers
- Windows Hacks – Miscellaneous

2. Windows Security and Auditing Tools

- Windows Registry Tools
- Windows and MSDOS Security and Auditing Tools
- Windows Local Security
- File/Disk/Log Shredders

3. Windows Miscellany

- Raw Sockets and Custom Packet Building
- A Few Little Extras for Microsoft "Fans"

::: Crypto, Virology, Cracking and Backdoors :::

1. Cryptography, Cryptanalysis, Steganography

- Crypto: PGP and GPG
- Crypto: Cryptanalysis
- Crypto: Steganography
- Crypto: Miscellaneous
- Misc. File Encryptors

2. About Viruses and Worms

- Virus Info Files and Advisories
- Worms

Re: Computer Security Information and What You Can Do To Keep Your System Safe!

- Virus/Worm Protection Utilities

3. Backdoors, Trojans and defenses

- Back Orifice and BO2K
- SubSeven and Addons
- Other Remote Administration Tools
- Trojan Detectors/Removers/Retaliators
- Information Files

:: Learn what Hackers know, how they do it, and what you can do to keep your system safe ::

1. General Hacking Information

- General Security Concepts
- Antique Systems
- Oracle
- Tools, Advisories and Exploits affecting multiple platforms
- PC Software and BIOS Hacking
- Truly Miscellaneous Hacking Info

2. Password Security

- Password Hacking
- Password Generators
- Password Security Audit Programs
- Word Lists

3. Scanning, Fingerprinting and similar techniques

- Network Scanning
- "Wargames" Modem Carrier Scanning
- Fingerprinting
- Sniffing

4. How Hackers Attack Numerous Internet Services

- Denial of Service Attacks
- Email and News
- Proxies and IP Spoofing
- DNS and BIND
- SPAM
- FTP
- General Unsorted Information
- Indispensible Internet Utilities
- Cable and DSL Info and Hacking

5. How Hackers Attack Web Servers, CGIs, PHP, ASP, etc...

- Web Site Hacking – General and Miscellaneous
- Web Site Hacking – Specific Sites
- Web Site Hacking – Servers
- Web Site Hacking – CGI, Perl, ASP, PHP etc.
- Web BBSes
- Web Site Hacking – Audit Tools

6. How Hackers attack IRC, Instant Messaging, and Multiplayer Games

Re: Computer Security Information and What You Can Do To Keep Your System Safe!

- ICQ Hacking
- IRC Hacking, Scripts and Bots
- AOL Instant Messenger (AIM)
- Miscellaneous Chat/gaming Systems

7. Vulnerabilities found in Platforms with Smaller Market Share

- Macintosh
- PalmOS
- Printers
- Dedicated Network Appliances, Hubs, Routers, etc...
- Cisco Equipment
- Miscellaneous

8. How Hackers Attack Novell and 802.11b Networks

- Novell Networks
- Wireless LANs
- X.25 Networks
- Miscellaneous Networking Information

::: Computer Security Information :::

- Access Control
- Basics
- Chat Systems
- Cryptography
- Denial Of Service
- Hacking Security Groups
- Hardening Securing Papers
- ICQ
- Intrusion Detection Systems
- IRC
- Miscellaneous
- Network Auditing Security Penetration
- Online Privacy
- Operating Systems
- Protocols

::: Phreaking – The black art of telephony :::

1. GENERAL – General Information About the Phone Company

- Hacking Answering Machines and Voice Mail
- Phreaking Programs

2. Electronic Toll Fraud and Other Phone Devices

- The Fixer's Box Review – Read this before you read the rest of these files!
- Blue and Green Boxes
- Red Box
- Beige and Bridge Boxes
- Various new boxes
- Programs to generate phreak tones

3. All about Payphones, COCOTs, BOCOTs, etc...

Re: Computer Security Information and What You Can Do To Keep Your System Safe!

- Payphones
- COCOTs
- Nortel/Quortech Millennium
- Smart Cards/Phone Cards

4. Cellular Telephones and the Hacking Thereof

- Cellular Phones by Manufacturer
- Miscellaneous Info
- Miscellaneous Utilities

5. Caller ID and ANI

- Caller ID and CLASS
- ANI and ANAC

6. Scans, numbers of interest

- Lists of Phone Numbers

7. Sounds from the phone system

- SIT Tones are said to thwart predictive dialers used by Telemarketers!

:: Security Publications ::

- Computer Incident Advisory Capability
- Call And Response Telephone Compilations
- Forbidden Knowledge
- Keen Veracity
- Lexxicor
- Midnight Hackers Private Club
- Phrack
- Risks Forum Digest
- Tricks Of The Trade
- Underground Periodical

:: Law, Privacy, Wetware, Hardware, File Sharing and more ::

1. HARDWARE – Hardware, Electronics, Radio etc.

- TEMPEST
- Bugs and Listening Devices
- Miscellaneous

2. Hackers and the Law

- Copyright Law and Cases
- Net Censorship
- Cases involving 2600 Magazine
- The SDMI affair
- Brian West
- September 11th Backlash Legislation
- General Legal Bufu

3. About Napster, Gnutella, and other File Sharing schemes

4. About your dwindling privacy

Re: Computer Security Information and What You Can Do To Keep Your System Safe!

- Privacy Digest
- Internet Privacy
- Espionage
- Privacy Deprivation Tools

5. Wetware Hacking!

- Social Engineering and NLP
- Seduction
- Miscellaneous Wetware Hacking

6. Physical Security, Scams etc...

- Physical Security and Countersecurity
- Financial Crimes Detection and Prevention
- Vending Machine Hacking

:: The standards that define the Internet ::

1. RFCs – Internet RFCs 3094 to 3195

- Internet RFCs 3094 to 3195

2. Other Standards and Official Publications

- US Department of Energy CIAC–2300 Documents
- NIPC CyberNotes
