Hi Tom,

Thanks for your reply.

Yes, you should have ""Enable this computer as a router" checked. Also, please check the Local area network (LAN) routing only. For the remote access server to forward traffic properly inside your network, you must configure it as a router so that all of the locations in the intranet are reachable from the remote access server.

Based on my research for the event 20050, please take the following steps:

1. Check to ensure the SBS Server is using a static IP address on its LAN interface.
2. Open the DHCP on SBS, ensure that the LAN Interface's IP address does not falls into the configured DHCP scope. If it is, add an exclusion range in the DHCP scope to exclude the server's LAN IP address from the addresses assigned to DHCP clients
3. Removed the DHCP address leases for the VPN ports in DHCP management console. Restarted the Routing and Remote Access service and try again.

Hope this helps.

I am looking forward to hear from you.

If you need further assistance, please don't hesitate to let me know.

Best regards,

Robert Li(MSFT)

=====

This newsgroup only focuses on SBS technical issues. If you have issues

Re: Installing multiple SBS VPN clients

regarding other Microsoft products, you'd better post in the corresponding newsgroups so that they can be resolved in an efficient and timely manner. You can locate the newsgroup here:

<http://www.microsoft.com/communities/newsgroups/en-us/default.aspx>

When opening a new thread via the web interface, we recommend you check the "Notify me of replies" box to receive e-mail notifications when there are any updates in your thread. When responding to posts via your newsreader, please "Reply to Group" so that others may learn and benefit from your issue.

Microsoft engineers can only focus on one issue per thread. Although we provide other information for your reference, we recommend you post different incidents in different threads to keep the thread clean. In doing so, it will ensure your issues are resolved in a timely manner.

For urgent issues, you may want to contact Microsoft CSS directly. Please check <http://support.microsoft.com> for regional support phone numbers.

Any input or comments in this thread are highly appreciated.
