Go to the SBS and manually run Microsoft Update to check for updates – there's one that should appear after the installation of SP2 that may fix this.

Windows 2003 service pack 2 known issues on Small Business Server 2003

I just installed server pack 2. Now network wide AutoCAD 2008 is not opening. It locks up more than half way through the start up.

I can surf, I can send and receive emails. I can see everything I normally see on the network.
