When I logon to my server via RRW, the web page displays the ff error.  
I usually select the do not conue option and proceed to the server.  
How can I fix this problem.

There is a problem with this website's security certificate.

The security certificate presented by this website was not issued by a trusted certificate authority.

The security certificate presented by this website was issued for a different website's address.

Security certificate problems may indicate an attempt to fool you or intercept any data you send to the server.

We recommend that you close this webpage and do not continue to this website.

[Click here to close this webpage.](#)

[Continue to this website \(not recommended\).](#)

[More information](#)

If you arrived at this page by clicking a link, check the website address in the address bar to be sure that it is the address you were expecting.

When going to a website with an address such as <https://example.com>, try adding the 'www' to the address, <https://www.example.com>.

If you choose to ignore this error and continue, do not enter private information into the website.

For more information, see "Certificate Errors" in Internet Explorer Help.
