Hi Marina

Many thanks for your quick reply

All our hosting is done by Go-Daddy in the US (very cheap!) we have several accounts actually.

One question – if I reset the Thomson Router will that clear all the rubbish on it right now do you know – or do I need to manually delete them?

When you say my public IP ??? I'm at home right now so I cannot check it but I'm getting a bit confused here I'm afraid  
when I ping mail.jcm-group.com it returns 64.202.165.92 – which looks to me like Go-Daddy's mail server  
when I ping jcm-group.com it returns:– 208.109.181.212

You say "And in the router you need to forward to your external nic IP"  
Is that 172.26.0.2 ?

You say "You need the domain hoster to setup a DNS record that will be pointing to your public IP" so I just email Go-Daddy and request this – yes?

And the rest of this change from our old SBS2k set-up to 2003 all went so well ;-) only a few small issues...

Best wishes  
John

<news:%23quFcBFjIHA.4712@xxxxxxxxxxxxxxxxxxxxxxxxxxxxx>

Hi John,

The www.jcm-group.com has a different IP than the mail.jcm-group.com. The www is where your website is hosted. The mail is pointing to 64.202.165.92 which doesn't seem to be your public IP at all. You need the domain hoster to setup a DNS record that will be pointing to your public IP.  
You could also just fill in your public IP for the web certificate during CEICW.

Re: Cannot connect to RWW from home PC

And in the router you need to forward to your external nic IP, thus not the 192.168.16.2

Hi Larry  
Sorry! No I didn't mean that – I used mail.jcm-group.com as the cert and that produces an RWW of:-  
mail.jcm-group.com /remote

Larry it's NOT jmc – it is jcm-group that you should be trying to ping.

I get the following:-

-----  
Microsoft Windows XP [Version 5.1.2600]  
(C) Copyright 1985–2001 Microsoft Corp.

C:\Documents and Settings\Johnm.HOMEPC>ping jcm-group.com

Pinging jcm-group.com [208.109.181.212] with 32 bytes of data:

Reply from 208.109.181.212: bytes=32 time=243ms TTL=50  
Reply from 208.109.181.212: bytes=32 time=248ms TTL=50  
Reply from 208.109.181.212: bytes=32 time=243ms TTL=50  
Reply from 208.109.181.212: bytes=32 time=244ms TTL=50

Ping statistics for 208.109.181.212:  
Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),  
Approximate round trip times in milli-seconds:  
Minimum = 243ms, Maximum = 248ms, Average = 244ms

C:\Documents and Settings\Johnm.HOMEPC>

-----  
Does this help?  
You know – when I think bak to the original install of SBS2003 I think this router must hav ebeen connected as was installed vis tha MSoft setup – maybe why I've got all that rubbish on there – or maybe in fact it ran on SBS2000 for the last 5 years – and was never re-set

What to do now?

Re: Cannot connect to RWW from home PC

"Larry Struckmeyer" <lstruckmeyer(at)mis-wizards(dot)com> wrote in message [news:eu9TpfCjIHA.4196@xxxxxxxxxxxxxxxxxxxxxxxxxxxx](mailto:news:eu9TpfCjIHA.4196@xxxxxxxxxxxxxxxxxxxxxxxxxxxx)

Hi John:

Responding to the paragraph below:

<snip>

We have rerun CEICW sort of hoping it would sort out the router but no chance... We used mail.jcm-group.com/remote.

<snip>

If you mean that you used the above as the cert in the CEICW, there is no need to have the "/remote". And mail.jcm-group will only work if there is a public DNS record for that name/ip combination. There must not be one, because I can't ping "mail.jmc-group.com"

Still can't telnet to any of your ports at your public ip address. Can you confirm what it is? [www.whatsmyip.com](http://www.whatsmyip.com)

---

Do you mean ipconfig for my PC or a PC  
on this network?

Just to recap – I can connect from any PC on  
my network using the FQDN  
to all the installed sbs features including  
RWW.

We have rerun CEICW sort of hoping it  
would sort out the router but no  
chance... We used  
mail.jcm-group.com/remote.  
I think this must be a router problem and

Re: Cannot connect to RWW from home PC

very frustrating – maybe it  
needs re–setting and starting all over!

The router was supplied about 5 years ago  
by Telefonica here in Spain –  
It's a Thomson 510. After much trouble  
logging on to it using  
10.0.0.138 as it keeps timing out – however  
I have now forwarded ports  
443 444 and 4125 to the server ip  
192.168.16.2 (is this correct?)  
it appears to be set to DHCP = auto  
DNS = not defined  
The Ip and routing tables look like this:

---

telefppp 83.38.30.56/32 Auto pat

eth0 169.254.243.18/16 Auto none

eth0 172.26.0.1/16 Extra none

eth0 10.0.0.138/8 Extra none

loop 127.0.0.1/8 Auto none

IP route table

Destination	Source	Gateway	Intf
192.168.153.1/32	83.38.30.56/32	83.38.30.56	telefppp
169.254.0.0/16	169.254.0.0/16	169.254.243.18	eth0
172.26.0.0/16	172.26.0.0/16	172.26.0.1	eth0
10.0.0.0/8	10.0.0.0/8	10.0.0.138	eth0
192.168.153.1/32	any	83.38.30.56	telefppp
83.38.30.56/32	any	83.38.30.56	telefppp
169.254.243.18/32	any	169.254.243.18	eth0
255.255.255.255/32	any	10.0.0.138	eth0
172.26.0.1/32	any	172.26.0.1	eth0
10.0.0.138/32	any	10.0.0.138	eth0
127.0.0.1/32	any	127.0.0.1	loop

Re: Cannot connect to RWW from home PC

169.254.0.0/16 any 169.254.243.18 eth0

172.26.0.0/16 any 172.26.0.1 eth0

10.0.0.0/8 any 10.0.0.138 eth0

Hi John,

Please post the ipconfig/all  
from the server and a client.

If you have a router, you  
need to forward ports in the  
router to the  
external nic IP.

Re: Cannot connect to RWW from home PC

the  
device  
with  
your  
browser  
(follow  
the  
setup  
instructions  
for  
the  
device)  
and  
forward  
the  
ports  
to  
the  
nic  
in  
your  
SBS  
that  
listens  
on  
the  
internet.  
For  
a  
two  
nic  
server,  
that  
is  
know  
as  
the  
external  
nic.

Do  
not  
add  
things  
to  
ISA,,,,  
CEICW  
does  
this  
for  
you.

Re: Cannot connect to RWW from home PC

If  
you  
have  
been  
adding  
and  
subtracting  
things  
from  
ISA  
you  
may  
have  
messed  
it  
up  
beyond  
the  
ability  
of  
this  
forum.

I  
would  
strongly  
consider  
uninstalling  
ISA,  
getting  
the  
RWW  
etc  
to  
work,  
then  
reinstalling  
ISA.  
You  
have  
to  
run  
the  
CEICW  
after  
each  
un  
install  
re  
install,  
as

Re: Cannot connect to RWW from home PC

it  
does  
it  
differently  
for  
a  
ISA  
installation.

would  
be  
greatly  
appreciated.  
Obviously  
missing  
something  
obvious  
somewhere!

This  
is  
what  
I  
have  
right  
now.

If

Re: Cannot connect to RWW from home PC

I  
run  
RWW  
from  
my  
PC  
within  
the  
network  
using  
our  
FQDN  
it  
works  
perfectly

–  
and  
what  
a  
super  
facility  
this  
is!  
When  
I  
finally  
get  
it  
working  
from  
the  
internet  
that  
is....

I  
am  
running  
ISA  
2000  
so  
I'm  
sort  
of  
assuming  
that  
if  
something  
hasn't  
been  
setup

Re: Cannot connect to RWW from home PC

correctly  
using  
the  
wizard  
that  
it  
can  
be  
added  
in  
ISA  
management?  
When  
I  
look  
in  
Access  
Policy  
->  
IP  
Packet  
Filter  
I  
see  
port  
443  
in  
and  
out  
I  
did  
not  
see  
port  
4125  
so  
I  
added  
it  
I  
did  
not  
see  
port  
444  
You  
say  
forward  
443  
and  
4125

->  
Network  
Configuration  
->  
Routing?  
What  
do  
I  
have  
to  
put  
in  
there?  
  
We  
ran  
SBS2000  
for  
6  
years  
-  
never  
had  
any  
of  
this  
-  
2003  
seems  
a  
lot  
more  
security  
minded.

Re: Cannot connect to RWW from home PC

I'm  
sure  
it's  
easy  
once  
you  
get  
your  
head  
round  
it  
and  
much  
better.  
On  
the  
whole  
it's  
been  
running  
for  
2  
months  
now  
without  
that  
many  
problems  
–  
we  
are  
running  
all  
the  
latest  
fixes  
(more  
or  
less)  
apart  
from  
upgrading  
to  
ISA2004  
–  
we  
are  
waiting  
for  
the  
CD

Re: Cannot connect to RWW from home PC

your  
server.  
Have  
you  
run  
CEICW  
and  
enabled  
the  
firewall,  
including  
the  
services  
like  
RWW  
that  
you  
would  
like  
to  
use?  
In  
the  
router  
you  
will  
have  
to  
forward  
port  
443  
and  
4125  
(needed  
for  
RWW)  
to  
your  
SBS.

Hi  
again  
Well  
maybe  
I'm  
missing  
something  
here  
but  
I  
tried  
as  
suggested  
using  
<https://mail.jcm-group.com>  
and  
still  
nada!  
Getting  
this  
below.  
I  
can  
ping  
jcm-group.com  
-  
which  
has  
a  
fixed  
IP  
but  
cannot  
get

Hi  
John:

When  
you  
run  
the  
CEICW  
you  
put  
in  
the  
address  
of  
your  
RWW  
page.

Re: Cannot connect to RWW from home PC

This address must be either your public IP address, or an URL address for which there is a public DNS record.

If you are receiving mail at your exchange server you have such a record already. Normally this would be something like "mail.yourdomain.com" which would point to your public IP

Re: Cannot connect to RWW from home PC

address,  
so  
in  
the  
CEICW  
you  
put  
"mail.yourdo  
It  
does  
not  
have  
to  
be  
that,  
and  
you  
can  
add  
public  
DNS  
records  
that  
point  
to  
"fuzzy\_slipp  
if  
you  
wish.

The  
last  
step  
is  
to  
forward  
the  
ports  
required,  
443,  
444,  
4125  
from  
whatever  
router/firewa  
device  
sits  
at  
that  
ip  
address

Re: Cannot connect to RWW from home PC

to  
the  
ip  
address  
of  
the  
listening  
nic  
ip  
in  
your  
SBS.

Then  
from  
outside  
the  
LAN  
you  
point  
your  
browser  
to  
"mail.yourdo  
to  
hit  
the  
RWW  
page,  
where  
you  
can  
select  
which  
service  
to  
use.
