In article <#Lk1eeO3IHA.2348@xxxxxxxxxxxxxxxxxxxxxxxx>, alex@respond\_to\_group says...

I would love to know how the filtered spam is being verified to achieve ZERO false positives.  
I hope you are not deleting or rejecting any emails without verification.

All items are recorded before being deleted, review for the first month after an install, no complaints about missing emails, and in some cases the email that is spam/bulk is quarantined instead of deleted.

All email suspected of being spam is marked as SPAM: prepended to the subject line.
