Yes and the Administrator does have full access.

"John Oliver, Jr. [MVP]" wrote:

Have you checked those directories Permissions to insure the Administrator has Full Access?

I have a new customer that I just started working with and found that they have not had a successful backup in a month! Unfortunately I have not found a resolution. I have rerun the backup wizard many times, and reclaimed the drives with the Admin account.

Standard SBS 2003 Build on a dell server. No SQL present. They use NTBackup and have not had any issues till this point. Initaly we had an external drive that filled up so I have placed a temporary 500GB drive on site to try and get a backup. Below is the log file from the 5th.
