Hello everyone,

I'm Andy, I'm running SBS 2003 R2 standard with Exchange. The outgoing email is fine. However, the incoming email is half an hour delay. I tried sending from Yahoo, Gmail, Hotmail and they all arrived half an hour later. Please help!

Thank you,

Andy

Can you attach the header of a delayed e-mail?

If you use outlook, open the mail and click on view, options and look at the text below, highlight and paste here.

Holz

Thank you Holz,

I did the tests by sending mails using the Yahoo and Gmail account, and approximately 20 mins later the mails arrived.
