Please check and make sure the internal nic is on top of the bindingorder in Network Connections, Advanced, Advanced. Check for updated nic drivers. Disable the advanced features on the nics for offload, checksum and receive side scaling.

Are you sure it is event 1050? As I can't find that referring to
your
problem?

Re: Event ID 1050 and 1030

Apologies, but it should have been Event ID 1058.

Regards

Trevor

The NIC's were in the correct order. Updated the drivers to the latest version. I have also disabled offload checksum. There was no receive side scaling entry.

Still getting the Event ID 1058 error.

Regards

Trevor
