Yes, The \$ ones are all machines. And Yes dwayne was leaving his machine on.

"Dave Nickason [SBS MVP]" wrote:

The ones with the \$ are all computer names, right? Those should be system events rather than user events.

Is Dwayne leaving his desktop PC running overnight? Logon Type 3 is a logon from a different machine in the local network. See <http://www.windowsecurity.com/articles/Logon-Types.html>.

here are 2 of the dwaynes and one susan\$
what are the ones with \$ after them?
