How about if I allow logon to the server, but restrict the other computers she can logon to?

"SteveB" <[news:elWxcpvhJHA.1252@xxxxxxxxxxxxxxxxxxxxxxxxxxxx](mailto:news:elWxcpvhJHA.1252@xxxxxxxxxxxxxxxxxxxxxxxxxxxx)> wrote in message

I don't think you can restrict the login to the SBS since you're logging in and authenticating there for OWA and RWW.

Yes, she is.

Yes, her computer and one other (not the server).

Is the user a member of the Remote Web Workplace security group?

Have you set up ADUC to limit which computers can be logged on to?

SBS 2003 Premium, current with patches and updates. User running Vista Business.

=====  
New employee, setup in SBS with Add User Wizard. Unable to login to OWA or RWW either internally or externally – also tried on other computers.
