Hello,

Thank you for posting here.

According to your description, I understand that:

You use the robocopy to copy shared folders from c:\shared folder d:\shared folder.

If I have misunderstood the problem, please don't hesitate to let me know.

Suggestions:

=====

Please understand that the Robocopy included with the Microsoft Windows Server? 2003 Resource Kit Tools is not a feature in SBS system. To effectively troubleshoot the issue, I'd like to suggest you to post a new thread in the Technet Windows Server forum to get help from Windows Server experts. You may get the Technet Windows Server forum from:

Microsoft TechNet > Forums Home > Windows Server

<http://social.technet.microsoft.com/Forums/en-US/category/windowsserver>

If you intend to copy files, there is another tool named RichCopy that achieve your goal. You may try to check how it works to copy folders with RichCopy.

Utility Spotlight > RichCopy

<http://technet.microsoft.com/en-us/magazine/2009.04.utilityspotlight.aspx>

Hope this helps. Also, if you have any questions or concerns, please do not hesitate to let me know.

Best regards,

Miles Li
