Scott Hanselman is an ASP.NET MVP who does a weekly 30 minute podcast on various technologies. Not too long ago Scott posted a blog entry on dealing with XML easily in C#. I commented on this blog article about how you could use MSH to do this even more easily. Anyway that got Scott interested in looking at MSH again and it didn't take him long to decide that he needed to do a show on this new shell. Anyway, have a listen to it hear:

<http://www.hanselminutes.com/default.aspx?showID=12>

Scott also has some nice things to say about the design of Monad on his blog:

<http://www.hanselman.com/blog/LovingMushIMeanMonad.aspx>

I sure hope that the Monad was wanting wider exposure for MSH because it is getting it. My little blog has logged over 1000 views in the past two days which is, ahem, a lot more than usual. :-)
