Haven't seen a Swen Virus around for a while.
(the OP contains one)

Hope you're all Protected.

Microsoft Client

this is the latest version of security update, the
"February 2004, Cumulative Patch" update which resolves
all known security vulnerabilities affecting
MS Internet Explorer, MS Outlook and MS Outlook Express
as well as three newly discovered vulnerabilities.
Install now to maintain the security of your computer
from these vulnerabilities, the most serious of which could
allow an attacker to run code on your computer.
This update includes the functionality of all previously released
patches.
