I have a windows 2003 server that is a member server in a windows 2000 domain.

I'm getting the following errors and can't really find any info.

Event ID 1006

User NT AUTHORITY\SYSTEM

Windows cannot bind to local.mydomain.com (Local error)

Group Policy Processing aborted

Event ID 1030

Windows cannot query for the list of Group Policy objects. Check the event log for possible messages previously logged by the policy engine that describes the reason for this.

EVENT ID 3012

SOURCE LoadPerf

The performance strings in the Performance registry value is corrupted

When process Performance extension counter provider.

BaseIndex value

from Performance registry is the first DWORD in Data section, LastCounter

value is the second DWORD in Data section, and LastHelp

value is the

third DWORD in Data section.

Event ID 3011

Unloading the performance counter strings for service

WmiApRpl

(WmiApRpl) failed. The Error code is the first DWORD in Data section.

the 2003 server is a member server not a DC.

THANKS FOR ANY HELP
