Hello.

I have a problem with Tivoli backup software and ASR on Windows 2003. The procedure with ASR goes well but Tivoli needs the network card driver (Intel Pro1000) so he can continue with the restore. There is a procedure how to insert the driver into the ASR but it doesn't seem to work.

Is there a way to insert the driver into the installation cd (driver.cab?) so that win can recognize the network card and install the driver?

Something like a driver slipstream...

Anyone heard something how to do it?

Thanks,  
Damjan.

.
