Hi Peter,

Thanks for the reply. After further research, it appears that I'm totally out of luck. I do need a 2003 server box and fortunately didn't pay alot for it.

As far as the .NET 2.0 / Visual Studio 2005, I'll live with the crappy screen display for the balance of 2006 and pick up a new laptop when Vista comes out.

Oh well, there are worse things to deal with in life.

Jim
