Just an add-on, since Daniele wrote that she already has put the TS into "Per User" licensing mode:

There is a bug in 2003 TS, which makes it change back its licensing mode to "Per Device" under certain conditions. Check if this applies to you, and if it does, call Microsoft Support and ask for this hotfix. If you don't ask other support questions during the call, hotfixes are free of charge.

834651 – Terminal Services Licensing mode changes from Per User to Per Device after you add or remove a Windows component

<http://support.microsoft.com/?kbid=834651>
