Yep, I've restarted the server. I've also tried stopping the service and starting it manually and it still hangs with an message "Could not start the License Logging Service service on Local Computer. Error 1053: The service did not respond to the start or control request in a timely fashion.

Thanks!!

Event Type: Error

Event Source: Service Control Manager

Event Category: None

Event ID: 7022

Date: 2/17/2005

Time: 3:01:12 PM

User: N/A

Computer: NT2000

Description:

The License Logging Service service hung on starting.

I'm also getting this in the event viewer and I've done the nbtstat -n and administrator is the one with a conflict???? I don't know if these two are related???

Event Type: Error

Event Source: NetBT

Event Category: None

Event ID: 4320

Date: 2/17/2005

Time: 1:27:33 PM

User: N/A

Computer: NT2000

Description:

Another machine has sent a name release message to this machine probably because a duplicate name has been detected on the TCP network. The IP address of the node that sent the message is in the data. Use nbtstat -n in a command window to see which name is in the Conflict state.
