Here's how you can do it:

How to enable the taskbar clock

[http://terminal.servebeer.com/php/taskbar\\_clock.php](http://terminal.servebeer.com/php/taskbar_clock.php)

But be sure to read this first:

186505 – Terminal Server Client Taskbar Clock Not Enabled

<http://support.microsoft.com/?kbid=186505>

Does anybody please know how you can get the taskbar to display the clock by default when creating Terminal Service profiles on Windows Server 2003?

It would be very easy of course to just add it but we run our Terminal Servers reasonably secured via Group Policy and so users are prevented from making adjustments to anything like the desktop or taskbar or accessing Control Panel. But I can't see anywhere within Group Policy to automatically 'display clock' on new or existing profiles – I guess there must be a registry tweak somewhere though?

Any suggestions much appreciated.
