Hi

Why would you replace explorer.exe ?

A usual way to launch application when a user logs on:

<http://technet2.microsoft.com/WindowsServer/en/library/04430bc5-4e7e-45d9-85a9-d6b11bbb09451033.mspx?mfr=>

Best Regards

Is there a way to start an application *_instead_* of the explorer when a terminalsession is started?

That means that the explorer process should not get started at all or should be killed immediatly.

I still use the Win 2000 Server in this case.

thanks for hints
Matthias
