I also wanted to state that this might not work, because when I look at the GPO settings --> delegations, my username and a couple of others have the Apply Group Policy field - Deny is "checked". It might be another cause, but i'll wait to see if that change has any effect. I tried the gpupdate command at the dos prompt and still i'm getting the same results. Tomorrow i'll post back to let you know the status.

"Style23" wrote:

Thats makes perfect sense, of course I couldn't see it. I just made the changes and i'll get back to the newsgroup if its a success.

"Vera Noest [MVP]" wrote:

Can this be the cause?

Prevent Roaming Profile changes from propagating to the server  
Enabled

\\homesvr\user profiles\tom - For User Profile

\\homesvr\ts roaming profiles\tom - For Terminal Server

RE: Terminal Services w/ printers

Profiles

Seems like 2 different profiles. It use to work fine before and now if I add a printer it will not save nor if I delete a printer it will nto save. Can it be something in my GPO settings. This is for all users who logon to the 3 computers that are the terminal servers, and this is only happens to the roaming profile. Once again I state if I change them to local there settings will save. But I don't want them logging on locally.

"Vera Noest [MVP]" wrote:

Sounds like you use the same profile for client and TS logons.  
Then the results become often unpredictable

RE: Terminal Services w/ printers

(last write/save operation wins). Is also known to lead to profile corruption.  
Make sure that you define different profiles for client and TS.

The printer is not setup on the local client machine nor does the printer display a session when looking at the settings on the terminal server. Strange?

"Support\_Pmax" wrote:

Is the printer still setup on your local computer? How is it displayed in your Printers, does it have a session attached to it?

"Style23" wrote:

I  
log  
onto

RE: Terminal Services w/ printers

a  
terminal  
server  
with  
a  
Roaming  
Profile.  
There  
3  
computers  
people  
log  
onto  
to  
access  
this  
one  
program.  
There  
is  
a  
policy  
set  
so  
the  
user  
can't  
do  
basically  
anything  
but  
run  
the  
program  
and  
go  
into  
the  
printer  
settings.  
My  
question  
is  
when  
i'm  
in  
the  
terminal  
server  
and  
delete

RE: Terminal Services w/ printers

this  
printer,  
once  
I  
log  
off  
and  
then  
log  
back  
into  
the  
terminal  
server  
the  
printer  
is  
back.  
The  
printer  
that  
i'm  
deleting  
is  
no  
longer  
on  
the  
network  
nor  
installed  
on  
the  
computer  
it  
was  
locally  
hooked  
up  
to.  
I  
deleted  
the  
registry  
key  
which  
holds  
the  
printer  
setting  
and

RE: Terminal Services w/ printers

it  
comes  
back,  
once  
I  
log  
off  
and  
log  
back  
on.  
Basically  
any  
change  
that  
I  
make  
with  
in  
the  
terminal  
server  
while  
i'm  
roaming  
it  
will  
not  
save.  
I  
have  
administrator  
rights  
and  
a  
GPO  
is  
applied  
to  
the  
3  
computer  
but  
for  
my  
username  
the  
GPO  
doesn't  
apply  
to

RE: Terminal Services w/ printers

RE: Terminal Services w/ printers

me.  
If  
I  
log  
on  
locally  
I  
can  
add  
and  
delete  
a  
printer  
and  
it  
will  
save,  
but  
for  
roaming  
it  
reverts  
back  
to  
an  
old  
setting.  
Any  
answers  
to  
this  
problem?

Client  
computers:  
Window  
XP

Server:  
Windows  
Server  
2003
