Does anyone know how to do this in 2008 please?

Thanks,
Mike

What about setting DENY for domain admins for the
Advanced
delegation settings on the policy?

Re: TS and Non TS working

Hi Vera,
Excellent –that works nicely thanks.... the
only drawback I can
see is that when I login under the
Administrator account the
policies are still applying – is there any way
around this
other than moving the TS from the OU?
Thanks,
Mike

"Vera Noest [MVP]" wrote:

Yes, loopback processing
solves this problem.
Link the restrictive GPO to
the OU which contains the
TS
computer account.
