Hello

Problem was solved.

Example Solution;

TS Clinet Printer Name: Oki ML3320 (redirected 1)

TS Name: W2K8TS

TS User Name: RTUser1

Download setacl http://sourceforge.net/project/showfiles.php?group_id=69165

setacl extract c:\setacl

@echo Remote Connection LPT1 Port Mapping

cd\

cd setacl

@echo Printer take ownership and permission

SetACL.exe -on "Oki ML3320 (redirected 1)" -ot prn -actn setowner -ownr n:W2K8TS\RTUser1

SetACL.exe -on "Oki ML3320 (redirected 3)" -ot prn -actn ace -ace "n:W2K8TS\RTUser1;p:full"

@echo Printer sharing

rundll32 printui.dll,PrintUIEntry /Xs /n "Oki ML3320 (redirected 1)"

sharename "RTUser13320" attributes +Shared

@echo Printer LPT1

net use lpt1 \\W2K8TS\RTUser13320

Thank you.

Best regards.

Hello,

My undarstend problem. Problem is Printer Security.

4 step

1-Redirected printer-properties-Security-Owner-select user-apply-OK-OK

Re: W2K8 TS Printer Share

2-Redirected printer-properties-Security-Select user-Manage Printer allow
check-apply-OK
3-Start-Run-CMD-rundll32 printui.dll,PrintUIEntry /Xs /n "redirected printer
name" sharename "sharing name"
4-Net use LPT1 \\computer\sharing name

How to 1 and 2 step script or batch ?

Best regards.

"Emre Demirci" wrote:

Hello Claudio,

I'm suffering security. If you script the manual work.

Example script:

```
rundll32 printui.dll,PrintUIEntry /Xs /n "Oki ML3320" sharename  
"gun13320"  
attributes +Shared
```

Error is given: "You do not have permission to modify the settings for this
printer. If you need to change the settings, contact your system
administrator."

How to settings group policy or other solution ?

Best regards.

Hello Claudio,

I can not forward with net use LPT1.
Sharing is not activated. What is the
solution of this W2K8?

Best regards.

Hi
Emre,

I
want
to
make
sure
I
understand
your
problem.

So
here
is
my
understanding.

Re: W2K8 TS Printer Share

You
have
client
machine
that
has
ML3320
printer
attached
to
it
locally.
Now,
when
you
TS
to
server,
you
get
the
ML3320
printer
redirected.
So,
until
here
everything
is
as
expected.

Now,
what
you
want
to
do
is
to
share
this
redirected
printer
ML3320
on
the
TS
server
so
that

Re: W2K8 TS Printer Share

other
users
can
use
this
printer
to
print
?
Is
this
right?

Thanks,
Kaushal
Mehta
{MSFT}.

Hello
Kaushal,

Example
W2K3
scenario;
Cilent
connect
local
LPT1
port
OKI
ML3320
printer.
Terminal
Server
IP
192.168.1.1
Cilent
connect
Terminal
Server
redirect
OKI
ML3320

Re: W2K8 TS Printer Share

printer
(no
problem).
Terminal
Server
OKI
ML3320
Sharing
printer
(My
problem
W2K8
TS
not
active
sharing)
Terminal
Server
OKI
ML3320
sharin
name
"ML3320"
Terminal
Server
Start-Run-CMD-net
use
LPT1
192.168.1.1\ML3320
Dos
application
send
printing
LPT1.

My
problem
is
how
to
redirect
printer
sharing
terminal
server
or
how
to
using
ms-dos
application

Re: W2K8 TS Printer Share

Re: W2K8 TS Printer Share

LPT1
W2K8
Terminal
server
?

Hello,

How
to
redirect
printer

Re: W2K8 TS Printer Share

share
?

Example
picture:
<http://img38.imagesh>

Best
regards.

I will have to find where I
put two scripts I wrote for
TS 2000/2003
(the latest one should work
on 2008) that do exactly
what you want.
Basically when a user
connects his TS mapped
printer is automatically
shared and then mapped to
the LPT1: port so DOS apps
work fine.

I will try on 2008 but my script used the rundll32 command
to do the
sharing automatically. This should still work on 2008 if I am
not mistaken.
