

Security Update for Microsoft Data Access Components (KB832483)

Source: <http://www.tech-archive.net/Archive/Windows/microsoft.public.windowsupdate/2004-03/1604.html>

From: Dean McNabb (dean_chunling_at_hotmail.com)

Date: 03/11/04

Date: Thu, 11 Mar 2004 01:27:42 -0800

I followed the advice found here:

<http://support.microsoft.com/?kbid=837188>

No luck (although the article wasn't to do with my problem I think).

I've tried microsoft email support and only got a half-hearted effort before they wanted my credit card.

Here is what my dahotfix.log tells me when trying to update:

[09:20:46]: 2.52,false[09:20:46]: Checking version of Microsoft Data Access Components that is currently installed on the machine.

[09:20:46]: An error occurred while setup was trying to verify the version of Microsoft Data Access Components current installed on the machine.

Either the version currently installed does not match the version of this hotfix package, or setup was unable to determine the version currently installed.

[09:20:46]: The action (NULL!CheckMDACVersionExact) returned FALSE.

Either all of the PreInstallActions for this package returned FALSE, or there was a fatal error while executing an action.

The package will not be installed. This error will not halt the setup process.

[09:20:46]: Executing PreInstallActions for package.

[09:20:46]: Loading function (CheckMDACVersionExact) from internal function list.

[09:20:46]: 2.52,false[09:20:46]: Checking version of Microsoft Data Access Components that is currently installed on the machine.

[09:20:46]: An error occurred while setup was trying to verify the version of Microsoft Data Access Components

current installed on the machine.

Either the version currently installed does not match the version of this hotfix package, or setup was unable to determine the version currently installed.

[09:20:46]: The action (NULL!CheckMDACVersionExact) returned FALSE.

Either all of the PreInstallActions for this package returned FALSE, or there was a fatal error while executing an action.

The package will not be installed. This error will not halt the setup process.

[09:20:46]: Executing PreInstallActions for package.

[09:20:46]: Loading function (CheckMDACVersionExact) from internal function list.

[09:20:46]: 2.53,false[09:20:46]: Checking version of Microsoft Data Access Components that is currently installed on the machine.

[09:20:46]: An error occurred while setup was trying to verify the version of Microsoft Data Access Components current installed on the machine.

Either the version currently installed does not match the version of this hotfix package, or setup was unable to determine the version currently installed.

[09:20:46]: The action (NULL!CheckMDACVersionExact) returned FALSE.

Either all of the PreInstallActions for this package returned FALSE, or there was a fatal error while executing an action.

The package will not be installed. This error will not halt the setup process.

[09:20:46]: Executing PreInstallActions for package.

[09:20:46]: Loading function (CheckMDACVersionExact) from internal function list.

[09:20:46]: 2.53,false[09:20:46]: Checking version of Microsoft Data Access Components that is currently installed on the machine.

[09:20:46]: An error occurred while setup was trying to verify the version of Microsoft Data Access Components current installed on the machine.

Either the version currently installed does not match the version of this hotfix package, or setup was unable to determine the version currently installed.

[09:20:46]: The action (NULL!CheckMDACVersionExact) returned FALSE.

Either all of the PreInstallActions for this package returned FALSE, or there was a fatal error while executing an action.

The package will not be installed. This error will not halt the setup process.

[09:20:46]: Executing PreInstallActions for package.

[09:20:46]: Loading function (CheckMDACVersionExact) from

internal function list.

[09:20:46]: 2.62,false[09:20:46]: Checking version of Microsoft Data Access Components that is currently installed on the machine.

[09:20:46]: An error occurred while setup was trying to verify the version of Microsoft Data Access Components current installed on the machine.

Either the version currently installed does not match the version of this hotfix package, or setup was unable to determine the version currently installed.

[09:20:46]: The action (NULL!CheckMDACVersionExact) returned FALSE.

Either all of the PreInstallActions for this package returned FALSE, or there was a fatal error while executing an action.

The package will not be installed. This error will not halt the setup process.

[09:20:46]: Executing PreInstallActions for package.

[09:20:46]: Loading function (CheckMDACVersionExact) from internal function list.

[09:20:46]: 2.62,false[09:20:46]: Checking version of Microsoft Data Access Components that is currently installed on the machine.

[09:20:46]: An error occurred while setup was trying to verify the version of Microsoft Data Access Components current installed on the machine.

Either the version currently installed does not match the version of this hotfix package, or setup was unable to determine the version currently installed.

[09:20:46]: The action (NULL!CheckMDACVersionExact) returned FALSE.

Either all of the PreInstallActions for this package returned FALSE, or there was a fatal error while executing an action.

The package will not be installed. This error will not halt the setup process.

[09:20:46]: Executing PreInstallActions for package.

[09:20:46]: Loading function (CheckMDACVersionExact) from internal function list.

[09:20:46]: 2.70,false[09:20:46]: Checking version of Microsoft Data Access Components that is currently installed on the machine.

[09:20:46]: An error occurred while setup was trying to verify the version of Microsoft Data Access Components current installed on the machine.

Either the version currently installed does not match the version of this hotfix package, or setup was unable to determine the version currently installed.

[09:20:46]: The action (NULL!CheckMDACVersionExact) returned FALSE.

Either all of the PreInstallActions for this

microsoft.public.windowsupdate: Security Update for Microsoft Data Access Components (KB832483)

package returned FALSE, or there was a fatal error while executing an action.

The package will not be installed. This error will not halt the setup process.

[09:20:46]: Executing PreInstallActions for package.

[09:20:46]: Loading function (CheckMDACVersionExact) from internal function list.

[09:20:46]: 2.70,false[09:20:46]: Checking version of Microsoft Data Access Components that is currently installed on the machine.

[09:20:46]: An error occurred while setup was trying to verify the version of Microsoft Data Access Components current installed on the machine.

Either the version currently installed does not match the version of this hotfix package, or setup was unable to determine the version currently installed.

[09:20:46]: The action (NULL!CheckMDACVersionExact) returned FALSE.

Either all of the PreInstallActions for this package returned FALSE, or there was a fatal error while executing an action.

The package will not be installed. This error will not halt the setup process.

[09:20:46]: Executing PreInstallActions for package.

[09:20:46]: Loading function (CheckMDACVersionExact) from internal function list.

[09:20:46]: 2.71,false[09:20:46]: Checking version of Microsoft Data Access Components that is currently installed on the machine.

[09:20:46]: The action (NULL!CheckMDACVersionExact) returned TRUE.

[09:20:46]: Loading function (AllOrNoneFileByFileVersionCheck) from internal function list.

[09:20:46]: Checking if any of the package files are already installed on this machine.
