Sorry for troubling you, Jack
and thanks for your response.

Apparently, I hadn't read the FAQ on the MS Document:

<http://www.microsoft.com/technet/security/bulletin/ms04-011.msp>

carefully enough. At times, I have this fear that ME is simply being ignored
in the Windows Update releases.

My apologies:

-Eli

| Frequently asked questions (FAQ) related to this security update

|
| Are Windows 98, Windows 98 Second Edition, or Windows Millennium Edition
| critically affected by any of the vulnerabilities that are addressed in
| this security bulletin?

|
| No. None of these vulnerabilities are critical in severity on Windows
| 98,
| on Windows 98 Second Edition, or on Windows Millennium Edition.

|
| -----
| How does the extended support for Windows 98, Windows 98 Second Edition,
| and Windows Millennium Edition affect the release of security updates
| for these operating systems?

|
| Microsoft will only release security updates for critical security
| issues. Non-critical security issues
| are not offered during this support period. For more information about
| the Microsoft Support Lifecycle
| policies for these operating systems, visit the following Web site.
