If you would kindly post what the specific error messages are that you are getting, perhaps a solution can be offered. Uninstalling SP2 is not a good solution for your problem.

| I have managed to download and install the Service Pack 2 update but have
| been having problems with the update crashing the computer whenever I have a
| cd in the cd drive when first booting up.

| I get a blue screen with error codes and am forced to shutdown and restart
| the computer. This has only started to happen after I installed the Service
| Pack, as the computer was working fine since I bought it 2 years ago.

| My question is this, does anyone know a safe way of uninstalling the service
| pack without reformatting the drive?

| I would like to restore the computer to its old service pack 1 state which
| was more stable.
