I have been working on this project for weeks and I can not get SUS to work! I am posting my registry keys as they are now. Can you please look at these and tell me if I am doing something wrong. I am also including the script you had posted on your site that I used to force the updates from the client to the server.

Thanks,
Rich Delaney

My Registry keys:

HKEY_LOCAL_MACHINE

Software

Policies

Microsoft

Windows

WindowsUpdate

WUserver REG_SZ

<http://UPDATER>

WUstatusServer

<http://UPDATER>

AU

AUOptions REG_DWORD 0x00000004(4)

NoAutoRebootWithLoggedOnUsers 0x00000001(1)

NoAutoUpdate

0x00000000(0)

RescheduleWaitTime

0x00000015(21)

ScheduleInstallDay

0x00000000(0)

ScheduleInstallTime

0x00000011(17)

UseWUserver

0x00000001(1)

HKEY_LOCAL_MACHINE

Software

Policies

Microsoft

microsoft.public.windowsupdate: Athif-SUS is still not working-Please help me!

```
Windows
  CurrentVersion
    WindowsUpdate
      AutoUpdate
AUOptions REG_DWORD
0x00000004(4)
AUState
  0x00000002(2)
ConfigVer
  0x00000001(1)
LastWaitTimeout REG_SZ
2004.09.22 07:02:55
NextDetectionTime REG_SZ
2004-09-17 19:53:31
OfflineDetectionPending REG_DWORD 0x00000001(1)
ScheduleInstallDay
0x00000000(0)
ScheduleInstallTime
0x000000011(17)
SUSServerVersion
0x00000001(1)
```

This is the modified script I obtained from your site:

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\WindowsUpdate]
"WUServer"="http://UPDATER"
"WUStatusServer"="http://UPDATER"
```

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\WindowsUpdate\Auto
Update]
"NoAutoUpdate"=dword:00000000
"AUOptions"=dword:00000004
"NoAutoRebootWithLoggedOnUsers"=dword:00000001
"RescheduleWaitTime"=dword:00000001
"ScheduleInstallDay"=dword:00000000
"ScheduleInstallTime"=dword:00000011
"UseWUServer"=dword:00000001
"LastWaitTimeout"=-
"DetectionStartTime"=-
```

And the batch file:

```
@echo off
Net Stop "wuauserv"
regedit.exe /s C:\SUS.reg(Location of REG file)
Net Start "wuauserv"
```

Athif-SUS is still not working-Please help me!
