Yes, Thankyou for these two responses. I have tried this link as well as another one that does the same thing. When I click these links, it asks me to login to my .NET account. After I do that, it takes me to a page that says, "Weâ€™re sorry, but there is no Microsoft.com Web page matching your entry. It is possible that you typed the address incorrectly, or that the page no longer exists. You may wish to try another entry or to use the links below, which we hope will help provide you with the information you need."

As a result, I am still not able to subscribe to these alerts. Either I'm doing something wrong, or the page is broken.

Any ideas? Thanks for your continued help.

Jon
