Hi

You need to unapprove those and maybe other IE updates as well at the SUS server (see list below).

A shortcoming with the current SUS version is that it does not handle superseding automatically, you must unapprove any superseded patches yourself.

MS04-038/834707 (October 2004 Cumulative Security Update for IE) supersedes (replaces) the following (and any earlier) cumulative patches for IE:

867801 MS04-025: July 2004 Cumulative Security Update for IE
832894 MS04-004: February 2004 Cumulative Security Update for IE
824145 MS03-048: November 2003 Cumulative Security Update for IE
828750 MS03-040: October, 2003, Cumulative Patch for IE
822925 MS03-032: August 2003 Cumulative Patch for IE
818529 MS03-020: June, 2003, Cumulative Patch for IE
813489 MS03-015: April, 2003, Cumulative Patch for IE
810847 MS03-004: February, 2003, Cumulative Patch for IE
324929 MS02-068: December, 2002, Cumulative Patch for IE
328970 MS02-066: November, 2002, Cumulative Patch for IE
323759 MS02-047: August 22, 2002, Cumulative Patch for IE
321232 MS02-023: May 15, 2002, Cumulative Patch for IE
319182 MS02-015: March 28, 2002, Cumulative Patch for IE
316059 MS02-005: February 11, 2002, Cumulative Patch for IE

Note that you soon need to unapprove MS04-038/834707 as well, because this one was released today, and will show up on your SUS server very soon:

microsoft.public.windowsupdate: Re: 824145 and 828750 updates

Cumulative Security Update for Internet Explorer (889293)
