Jim,

I am as confused with this newest update as "THEBFG" is. I am running Windows Millenium and MSIE 6.0.2800.1106 and have also kept my Windows Updates current to now. I don't know the difference between an "update," "rollup" or "hotfix."

Would I install this rollup 889669 or the update 889293?

Thanks for any help you can send my way.
Granny
