Hi

Your only option is to configure the servers to not auto-install the updates, just download them and notify. You must then log on to the server to install the updates and control the reboot.

Fyi, there is a separate newsgroup for SUS:

microsoft.public.softwareupdatesvcs

<news://msnews.microsoft.com/microsoft.public.softwareupdatesvcs>

URL to the group softwareupdatesvcs for those who uses the Web interface to access the newsgroups:

<http://www.microsoft.com/windowsserver2003/community/newsgroups/dgbrowser/en-us/default.aspx?dg=microsoft>

A Web site about SUS with a FAQ and a SUS forum:

<http://www.susserver.com/>

More SUS Web sites:

<http://www.cites.uiuc.edu/sus/faq.html>

<http://www.faqshop.com/sus/default.htm>
