Having read the posts on the above error for Updating Windows XP I've tried some of the tips posted here including updating the script software and updating the regsvr32wuaueng.dll file as advised.

Not sure what to try next but listed below are errors I get when I try to load the updates I need.

(Previous to tonight, Windows Update wasn't even listing the files I needed but some of the dll file changes/suggestions have got me a bit further but they downloads won't save, even with my firewall and anti-virus off.

Any suggestions would be appreciated?
