Every time i try to run windows update it hangs in the install screen saying "initializing " and it freezes up and the only thing i can do is, -control alt delete- to get out of it, It does the same thing when auto update sends them to my computer, It downloads them ok but it freezes up and it says "initializing " (excuse my grammer) in the install screen...

op.syst.-- windows xp home
SOMEONE
H E L P ME?

P L E A S E.....!
