Hi,

I am seeing this error from MU site while trying to MUing the Windows 2000 SP4 Server with the latest AU client version.

2005-11-20 09:46:52 3556 eac DtaStor WARNING: Update Service: Failed to update backup store

2005-11-20 09:46:52 3556 eac DnldMgr \*\*\*\*\* DnldMgr: New download job [UpdateId = {908122F7-60EF-46C2-A7F1-F5DA81D69859}.102]  
\*\*\*\*\*

2005-11-20 09:46:52 3556 eac DnldMgr WARNING: SetCredentials for NEGOTIATE AUTH proxy failed with 0x800704dd

2005-11-20 09:46:53 3556 eac DnldMgr FATAL:  
DM:CAgentDownloadManager::DownloadUpdate: pDownloadJob->Init failed with 0x8024401b.

2005-11-20 09:46:53 3556 eac DnldMgr WARNING: Got error (hr = 8024401b) starting update 0 in call 16. Notifying call.

2005-11-20 09:46:53 3556 eac DnldMgr Error 0x8024401b occurred while downloading update; notifying dependent calls.

We have an ISA 2000 SP2 with authentication enabled for outgoing web requests and followed the KB articles to allow anonymous access for WU sites and used PROXYCFG.exe to bypass and added WU sites to Trusted Zone with no effect.

Any ideas?

Happy Patching,  
Mohammed Athif Khaleel
