You may receive an error message that contains the "0x8DDD0018" code or the "0x80246008" code when you try to download updates from the Microsoft Windows Update Web site or from the Microsoft Update Web site
<http://support.microsoft.com/default.aspx?scid=kb:en-us:910337>

Make sure that you have automatic updates turned on.

Make sure that the Remote Procedure Call Locator is not disabled:

Click Start, select Run and type in:

services.msc

Locate " Remote Procedure Call (RPC) Locator".

If it is disabled, then right click on it, go to 'Properties', change to 'manual' and Apply.

Try Windows Update Again

What causes Error 0x8ddd0018

| anyone know how to help me fix this thing cos its annoying me

|

| whenever i start windows updater it comes up with this code saying i need

| some services to be activated else i cant use windows update

Re: errorcode : 0x8DDD0018 unknown on windows update faq

| services are
| Windows automatic updater
| intelligent background scanner(for windows update)
| and events log
|
| i can under stand the last 2 by all means since its part of the new update
| site but automated updates is something i never use for 2 reasons
| 1 its filling popus always come at bad timed moments
| 2 the autodownloads are annoying when it starts downloading during time iam
| either playing a game or work on the net since it uses extreme ammounts of
| bandwith
| iam still running on windows 2000 server edition also for some malicious
| reasons
| i formated my hdd yesterday so iam expecting that it works as normal since
| there aint no viruses or whatever in my system and the version i use is
| legitimate
