Thanks for the reply.

Here is what I get.

These updates must be installed separately

Updates listed here can have system-wide effects or address more than one problem. It's a good idea to install them now and then check again, starting from the Home page, for remaining updates.

Microsoft Windows XP

Windows XP Service Pack 1 (Express)

Download size: 0 KB , 0 minutes (Downloaded; ready to install)

Windows XP Service Pack 1 (SP1) provides the latest security, reliability, and performance updates to the Windows XP family of operating systems.

Windows XP SP1 is designed to ensure Windows XP platform compatibility with newly released software and hardware, and includes updates to resolve issues discovered by customers or by Microsoft's internal testing team. The maximum download size is approximately 30 MB, however the size of the download and time required may be less for computers that have had updates previously installed. To minimize the download time needed for installation, setup will only download those files which are required to bring your computer up to date. Windows XP SP1 includes Internet Explorer 6 SP1. Anti-virus software programs may interfere with the installation of Windows XP SP1. Please disable anti-virus software while installing the service pack. Microsoft recommends installing SP1 because it includes many of updates to help keep your computer secure. Once you have installed the service pack you should check back for additional updates. Alert: HP Pavilion and Windows XP Service Pack 1 Incompatibility

Download size: 112 KB , less than 1 minute

Alert: Windows Update has detected that your computer is a Hewlett-Packard Pavilion desktop or Compaq Presario desktop PC with Windows XP pre-installed. After you install Windows XP Service Pack 1, you might encounter an issue with the PC System Recovery utility. If you use this utility to perform a non-destructive system recovery, you might be unable to start your computer. Hewlett-Packard has released an update to the PC System Recovery utility to remedy this issue, which you can install from the Hewlett-Packard Web site. Once you install the update, this alert will no longer appear when you visit the Windows Update Web site. Alternatively, recovering from this error can be accomplished by running full destructive system recovery, which results in
