You tell me!!! All I know is that I reinstalled Win XP Home, and keep getting messages that this file/macro or whatever cannot be found. Cannot even do the MS Scan. As I thought it was something to do with graphics (as some do not load on sites like Explorer) I downloaded Adobe Flash–player and Shockwave. All MS/Windows updates are current.

Can you help?

How does this relate to Windows Update?

Hello – can anyone tell me how to locate this file/macro? I have just reinstalled Windows XPHome with SP2, but apparently this is missing. I have downloaded Flashplayer & Shockwave latest but no luck.

Thanks in hope.
