-

FWIW = for what it's worth

The update appears to have installed correctly.

I tried to find a file list for IE7 but could not. Am unaware that jscript.dll is updated to Version 5.7 by the installation of IE7.

I **doubt** that is the case as installing Windows Script 5.7 updates jscript.dll, but I could be wrong.

According to the Security Bulletin page:

<http://www.microsoft.com/technet/security/bulletin/ms07-057.msp>

When KB939653 is installed there is an entry made in Add/Remove Programs. Since I do not have IE7 installed, I'm assuming that it would show under 'Windows XP - Software updates' or, directly under the entry made for the installation of IE7.

Recommend you do what you'd posted previously:

Considering what's been said, i'd like to try the following solution:

1. Uninstall IE7
2. Check again version of jscript.dll in C:\WINDOWS\system32. If it is v.5.6.0.8831 (like the one i have in C:\WINDOWS\ie7), there's no need to install KB917344. If jscript.dll is v.5.6.0.8825 (like it is now), then reinstall KB917344.
3. Reinstall IE7
4. Reinstall the cumulative IE update KB939653.

Besides Avast, is there any other security software installed [Spybot Search&Destroy, etc] ?

Re: Missing Windows update reported as a vulnerability by TMH and BA

Apologise me, i'm not familiarized with certain acronyms. What does 'FWIW' mean ? I should write a glossary...:)

Thank you for helping. Here is the contents of KB939653-IE7.log. Most is written in English, but a few words are written in portuguese. I'll translate the following:

In Portuguese: "3.484: A configuração do KB939653 encontrou um erro: O ficheiro update.ver não está correcto."

In English: "3.484: The KB939653 setup has found an error: The file update.ver is not correct."

In Portuguese: "Ficheiro copiado (adiado)"

In English: "Copied file (postponed)" *OR* "Copied file (delayed)" ?

If you find any more, please let me know and i'll try to translate them.

Re: Missing Windows update reported as a vulnerability by TMH and BA

Post the contents of KB939653-IE7.log and we'll see which files have been installed to which locations and the Version number of them.

FWIW, I've never had any issues with Avast when installing updates, just connecting to certain sites.
