The last 3 updates you listed are all Cumulative Security Updates for Internet Explorer. Since they are Cumulative, you only need to install KB939653.

Is Internet Explorer 7 installed ? If yes, did this installation issue with the updates for IE start occurring after it was installed ?

If the answer is NO to both questions, let's start with KB929969 .. go to Start > Run > type in or copy and paste the below into the Open: line

```
%windir%\KB929969.log
```

Click OK or press Enter
The log will now open
Go back to Start > Run and enter

```
%windir%\KB939653.log
```

Click OK or press Enter

Please post the contents of both logs into your reply.
If they won't fit due to size, then please make 2 posts.

Hi all.

Having a problem with 4 separate updates that repeatedly install themselves throughout the day. They are:

Re: 4 updates

KB929969

KB931768

KB933566

KB939653

I need to figure out how to stop/prevent/delete these updates from always showing up. Any ideas would be greatly appreciated.
