Non-Security, High-Priority Updates on MU, WU, and
WSUS

Microsoft has released four non-security, high-priority
updates and 2007

Microsoft Office Service Pack 1 on Microsoft Update (MU)
and Windows

Server

Update Services (WSUS).

Microsoft has released four non-security, high-priority
updates for

Windows

and Windows SharePoint Services 3.0 Service Pack 1 on
Windows Update

(WU)

and WSUS.

References:

December 2007 Security Bulletins Summary:

Re: Microsoft Security Bulletins for December 2007

<http://www.microsoft.com/technet/security/bulletin/ms07-dec.mspx>

Security Bulletin for end-users:

<http://www.microsoft.com/protect/computer/updates/bulletins/200712.mspx>

MSRC Blog: <http://blogs.technet.com/msrc/default.aspx>

Support:

Call 1-866-PCSAFETY. There is no charge for support calls that are

associated with security updates. International users should go to

<http://support.microsoft.com/common/international.aspx>

Security Bulletin Webcast:

Microsoft will host a Webcast tomorrow. The webcast focuses on

addressing

your questions and concerns about the security bulletins.

Therefore,

most

of

the live webcast is aimed at giving you the opportunity to ask

questions

and

get answers from their security experts:

<http://msevents.microsoft.com/CUI/WebCastEventDetails.aspx?EventID=1032344696&Event>

Update sources:

Microsoft NEVER send security updates via e-mail. As always, download

the

updates only from the vendors' website – visit Windows

Update and Office

Update or Microsoft Update. You may also get the updates

thru Automatic

Updates functionality in Windows.

Security updates are available on ISO-9660 DVD5 image files from the

Microsoft Download Center. For more information, please

see

<http://support.microsoft.com/kb/913086>

Note: Don't be a victim of spoofed emails. Read "How to tell whether a

security e-mail message is really from Microsoft" at

http://www.microsoft.com/athome/security/email/ms_genuine_mail.mspx

Recommendations:

Microsoft advises customers to install the latest product releases,

security

updates, and service packs to remain as secure as possible.

Older

Re: Microsoft Security Bulletins for December 2007

products,
such as Microsoft Windows NT 4.0, may not meet today's
more demanding
security requirements. It may not be possible for Microsoft to
provide
security updates for older products. More info at Microsoft
Support
Lifecycle website: <http://support.microsoft.com/lifecycle/>

Tool:

Check your system for missing or misconfigured patches
using Microsoft
Baseline Security Analyzer (MBSA) –
<http://www.microsoft.com/technet/security/tools/mbsahome.mspx>
For 3rd Party tools in scanning your computer for missing
updates,
hotfixes
or out-dated version, please see the list at
<http://www.dozleng.com/updates/index.php?showtopic=13587>
