-

Error Code: 0x8024002D

means – a full-file patch failed because the source was required

If you were downloading a patch, repair Office install and try the patch again or try installing the patch with the Office CD in the installation drive.

| I am in the same situation. I have a new PC with VISTA loaded. I cannot
| complete the installation and when I am in excel it shuts down because the
| install is not accepted. Please help I cannot complete my work.
