PA Bear,

I still cannot update my files. I did both methods and even checked it, and it stated the file was on my computer when I did a second check with method #2. This is becoming very annoying now. From the post I have been reading this seems to be a major flaw with the update system. I have XP Professional. Any other suggestions on what to do would be greatly appreciated. I even bought the software to see if something else was going on that the other person posted (SG). Still no updates!!!! I will paste the notice I received today from the window's update):

Thank you.

Katmc

Re: windows update

Not Calven, but...

Updates are not installed successfully from Windows Update, from Microsoft Update, or by using Automatic Updates after you repair a Windows XP installation:

Calven,

I am having the same difficulties when trying to update. I have 85 updates not being installed. I have taken off my virus protection and have renamed and check everything mentioned in your post. Still, cannot install the updates..... I even reinstalled windows XP! Help!
